DETAILED ACTION

Note: the applicant agreed for the examiner's amendment made on June 25, 2005 canceling claim 33 for allowance of claims 1-32. Claim 33 included the language "a radar transmitter, carried by the aircraft for producing a pulsed radar signal having a carrier frequency of at least one gigahertz"; the contingency of having "an array of radar receiving antennas, carried by the aircraft for receiving a reflected signal produced by reflection of said radar signal and forming a real aperture for cross track resolution of the objects", and using the claimed at least three gigahertz produces the enhanced image resolution as explained in the specification on page 13 paragraphs [0090-0012]. Further, throughout the specification the use of three to ten gigahertz is the preferred embodiment, and there is no mention of having at least one gigahertz. Therefore, the cancellation of claim 33 in favor of allowance of claims 1-32 was made because of the claimed "at least one gigahertz".

Allowable Subject Matter

Claims 1-32 are allowed.
